Can a **Master Plumber** do **fuel oil system piping**?

The Board reviewed the scope of work of a Master Plumber in Contractors' Chapter 10 of the Code of Miami-Dade County as well as that of the Florida State Statute and it was clear that the generator exhaust piping and fuel oil system piping is within the scope of a Master Plumber. The plumbing Board member informed the department that the City of Miami was not allowing the issuance of a permit to a master plumber in referenced areas. ELECTRICAL APPEARANCES

LISANDRO DIAZ (MASTER ELECTRICIAN)

Wished to appear before the Board to discuss testing procedures regarding test retakes on a partial examination when in the interim there has been a change in examination service provider. Mr. Diaz took his Master Electrician examination on March 5, 2005 with PSI and passed the Business and Law part of the examination but failed the Technical portion. The testing procedures that have been in place allow an examinee to retake only the portion he failed within one year. However, Mr. Diaz and others are faced with the dilemma that there is now a different examination company from the time that they originally sat for their exam. Therefore, a ruling is needed as to retakes on a partial examination when another vendor is providing the service so that the appropriate directives can be given to the current examining company. This **appearance** was **withdrawn** as it was **administratively resolved**.
